- GitHub
- Postman
- Composer
- VS Code
- XAMPP
- Laragon

📁 PROJECTS

T Square Center 🔗

A comprehensive educational platform featuring an administrative dashboard and a student portal; It enables students to book courses, take assessments upon completion, and automatically receive a certificate after passing, all supported by a full login and management system built with Laravel and MySQL.

Dalilak 🔗

Developed a tourism platform that allows users to explore tourist attractions, book hotels and trips, and discover travel destinations. The platform also includes an AI-powered assistant that helps users find suitable destinations, answer travel-related questions, and provide personalized recommendations.

Online Store 🔗

Built an e-commerce website for selling products online with product listings, categories, shopping cart, checkout system, and admin dashboard.

Pannie.eg

Developed an online store for selling men's and women's clothing with product pages, sizes, categories, and a simple checkout system.

Lumere Perfume 🔗

Developed a perfume e-commerce website using Laravel, PHP, and MySQL with a responsive and user friendly design. Implemented core features including product management, order management system, shopping cart, and secure checkout.
